

Objective:

Learning to translate Internet pages to another language

Steps:

1. Open up Netscape
2. Go to the page that you want to translate
3. Write down the ADDRESS in the location box
4. DELETE this address and type in a new address into the location box: <http://world.altavista.com> and then hit ENTER

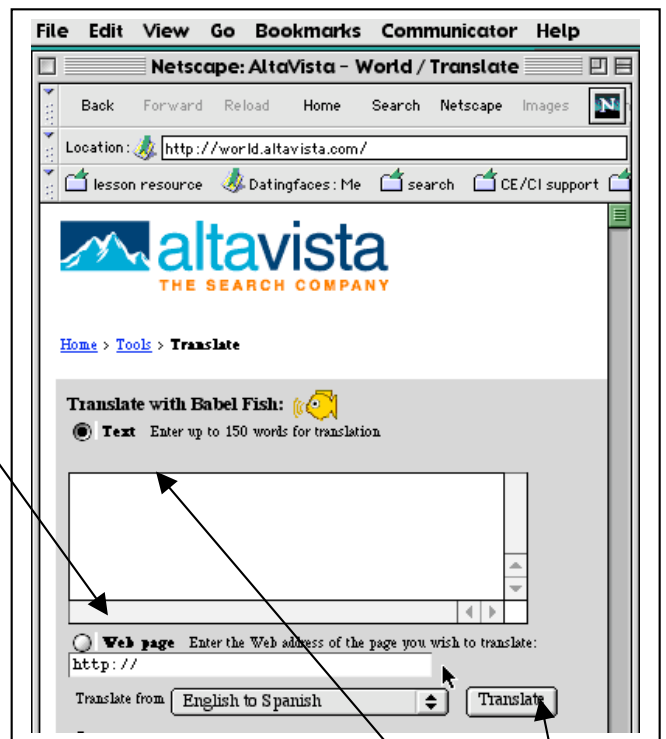

Your new WINDOW will look similar to this:

- A. Enter the ADDRESS, that you wrote down, in the box under the words **Translate a Web page**. Now click TRANSLATE

Note: DO NOT write http:// twice

- B. In a few moments, the new page will be appear. Click inside the new page once.
- C. You now have a choice:  
Go to FILE and highlight PRINT FRAME  
OR  
Read what is in the new page/frame, scrolling down as you need to see more

ALTERNATE APPROACH:

- A] GO TO EDIT and highlight SELECT ALL
- B] After all the information on the Internet page is selected, go back to EDIT and select COPY
- C] Follow the directions from step 4. shown above
- D] When the new window appears, CLICK once inside this box, then go to EDIT and highlight PASTE. The words will appear in the box. Click TRANSLATE
