

Maritime Safety Information

The USCG Light List is published in seven volumes and contains lights and other aids to navigation used for general navigation that are maintained by or under the authority of the U.S. Coast Guard and located in the waters surrounding the United States and its Territories. (Vol. VI is Pacific Coast)

I used the Light List Vol. VI to look up the Lat/Long coordinates for the approach buoys for several ports including Bodega Bay and others e.g., Fort Bragg, Shelter Cove. There is more information included in the Light List Vol. VI publication.
